

Geomagnetic Storms/Coronal Mass Ejections (CME)/Solar Flares and their effects on us.

Solar activity is known to effect human consciousness and the body. And with the continued increase in solar activity, which is projected for a few more years to come, it's important to note its effects.

Solar flares effect: the stomach lining, all brain activity, equilibrium, human behavior, and all psych-physiological (mental-emotional-physical) response.

Solar flares can cause us to be: nervous, anxious, worrisome, jittery, dizzy, shaky, irritable, lethargic, exhausted, have short term memory loss, heart palpitations, feel nauseous, queasy, have prolonged head pressure and headaches. (Had any of these lately?)

Solar flares and photon waves are changing the fabric of our physical reality as they have a powerful effect on our physical cellular level causing our cellular memories to awaken and clear. We often experience this as the body having "hot flashes".

Our **lower emotions** are low frequency energy stored in our cells from past experiences and traumas that we have experienced and never processed – so they become stored as cellular memories. **Photon energy** is a much higher frequency energy that pulls up the lower emotional frequency, so it can calibrate to the higher frequency...thus we find ourselves releasing these lower emotions of sadness and grief without knowing why. It may explain why we feel "**weepy**" at times. According to the article on www.bibliotecapleyades.net these spells will last for around 20 minutes and we are left wondering where these feelings came from out of the blue.

Many people are recently reporting, even in our area, that they are feeling agitated and uneasy, more so than normal, along with a marked increase in other symptoms:

Time and space are beginning to wobble even more erratically than before.

We seem to lose track of time easily.

We lose words when we are speaking.

The day simply disappears.

We are not sleeping well...again.

There is lots of turning and tossing in the night and many are having unusual dreams.

We feel huge energy surges in the body followed by energy drops.

Many reports of nausea, body aches, pain and dizziness.

Many are experiencing deep grief.

Some feel like they are walking on water, that is, ungrounded.

Others report that when they close their eyes at night, everything starts to spin.

Reports of visual disturbances.

Inner ear issues.

Buzzing or ringing in ears.

Throat and thyroid issues.

Cold feet.

Dryness of tongue.

The author states that this is nothing to be afraid of just get extra rest and drink lots of water. They too will pass in time.

In my 2012 series, lesson #21, www.pacificrimbible.com. I was able to tie in the serious increase in solar activity, (which we are presently experiencing), culminating in the prophecy stated in Revelation 16:8,9, “*And the fourth angel poured out his vial upon the **sun** (*helios*); and power was given unto him to **scorch** (*kaumatizo*) men with **fire** (*pur*). And men were **scorched** (*kaumatizo*) with great **heat** (*kauma*), and blasphemed the name of God, which hath power over these plagues: and they repented not to give him glory.*”

Now when people, believers included, think of the **sun** (*helios*), they think of it from the standpoint of light and heat. Which is true, the sun does produce light and heat. But the sun also produces other things beside light and heat and the word used to denote what the sun produces is *kaumatizo*, as we see mentioned twice in the passage and translated restrictively as scorched. But the **effect** of the sun's production (*kaumatizo*) is **kauma**, translated here as **heat**, which can effect us in many different ways other than just sunburn and heat stroke.

The **sun** (*helios*) also **produces** (*kaumatizo*):

Coronal Mass Ejections (CME)

Light made up of the total frequency spectrum of electromagnetic radiation.

It does produce heat felt even here on earth.

Ultraviolet ABC rays.

Infrared ABC rays.

Gamma rays.

X rays.

Photons.

And recently discovered unknown particles!

The sun (*helios*) produces (*kaumatizo*) heat and light that can be felt here on earth. And that can effect us (*kauma*) by sunburns, heat strokes, etc.. But those are **just two** of the things that the sun **produces**! It also produces: Coronal Mass Ejections (CME), light made up of the total frequency spectrum of electromagnetic radiation, ultraviolet ABC rays, infrared ABC rays, gamma rays, X rays, Photons, and recently discovered **unknown particles** as mentioned! And the list of things on the first page are just some of the known things that are effecting our bodies and our minds by these other things the sun produces other than just light and heat!

Hope this helps in some small way now and toward the future.

Mike
